

PSYCHOLOGICAL ZONES

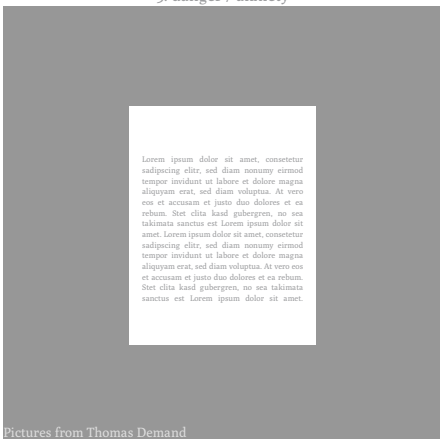

1. safety / comfort

2. inspiration / curiousness

3. danger / anxiety

Pictures from Thomas Demand

The design studio PSYCHOLOGICAL ZONES (Hochbau I / Bachelor 5) deals with the design for a new building with an interdisciplinary programme for social, medical and psychiatric support for drug addicts and homeless people.

Task O should investigate *traces* expressing a certain mood and atmosphere in a creative and experimental manner.

Create a series of three pictures taken in the surrounding of your site. Each picture should address one of the following moods and atmospheres:

1. safety / comfort
2. inspiration / curiousness
3. danger / anxiety

No people, only traces after their presence. Consider time and scale.

The idea should be explained with a short text, max. 10 lines.

Group work in pairs appreciated

Only b/w or grey

No scale

No specific size for each picture, but each should fit on an A4 landscape base (centrally arranged). Same applies for the text.

The work has to be handed in, Fri, 11.10., between 10-11 am at our department A 502. Please write on the back of each paper:

Name,
Matrikelnummer,
BA o. MA/M-ARCH-T,
Erasmus/Exchange,
e-mail address
(please all clearly to read!)
